"QUALITY FIRST"

Price List of Nursery Stock

OF THE

F. & F. NURSERIES

Springfield, Union Co., N. J.

Location, 17 miles from New York City
Millburn Station, D. L. & W. R. R.
Springfield Station, Rahway Valley R. R.
Electric Cars Pass Our Office Every Half Hour, giving Direct
Communication with Summit, Millburn, Newark, Elizabeth.
Phone, No. 152, Millburn

ESTABLISHED AT ROSELLE, N. J., IN 1882

Our stock is clean and free from disease, being inspected every year for that purpose

GUARANTEE—

WE GUARANTEE all our stock true to name and in good condition on leaving our hands, but we do not guarantee it to grow under all conditions, nor do we make up any loss whatever due to climate effects, or after culture on the part of the purchaser. In case any mistake should happen in the naming of a plant, we will replace it with the true variety as ordered, but we are not liable to more than its original invoice value in refunding money.

Local and Long Distance, Phone Millburn 152

To Our Customers

PRICES—Quoted are for best commercial grade and quality. *Trees selected by customers at the nursery will be charged for in accordance to their value.* We quote by height but it must be remembered that the height does not always indicate the value of a tree or plant—a very short and compact specimen is more valuable than a slim, straggly one of the same height. Customers can rely upon our selecting full value for the prices charged. We are firm believers in the graded stock system not generally in use in the nursery business. We grade according to height and caliper.

DELIVERY—We will deliver free of charge to nearby customers all orders exceeding an amount of \$10.00. A reasonable charge will be made for delivery of orders for less than that amount. A cash discount of 5% will be allowed to customers preferring to call for their stock, providing we are given due notice in advance so that such orders may be prepared in connection with other orders. Distant orders will be safely and securely packed in boxes or bales and delivered F. O. B. cars here, freight or express charges to be paid for by the purchaser, or arrangement may be made for delivery by auto truck and charge made per mileage.

TERMS—Customers with whom we have had no dealings heretofore should remit with order, or send satisfactory references. Old and known customers can, if they wish, remit on receipt of goods. All accounts are due, *net cash*, as soon as goods are received. Remit by Check, Draft, Express or Money Order, one and two-cent postage stamps accepted for small amounts.

EARLY ORDERS—Customers should send in their orders as early as possible so we can place them on our digging list. Our work in the digging season is necessarily very much crowded owing to our dependence on the weather conditions, and we can only in exceptional instances fill orders in other than regular turn.

DIGGING SEASON—Usually commences end of September in the fall continuing so long as ground holds open. In the spring from the middle of March until middle of May.

GUARANTEE—We guarantee all our stock true to name and in good condition on leaving our hands, but do not guarantee it to live and grow under all conditions, nor do we make up any loss whatever due to climate effects, or after culture on the part of the purchaser. In case any mistake should happen in the naming of a plant we will replace it with the true variety as ordered, but we are not liable to more than its original invoice value in refunding money.

TRANSPLANTING HINTS

We especially desire to impress upon all interested the importance of using only good soil and using it abundantly in planting all trees.

If the grade is not changed and there exists good natural fertility, no special preparation is required. If the grade is changed we urge the absolute importance of excavating a large area of subsoil and filling in with good top soil. Do this a year in advance if possible, that the soil may become compact. If this cannot be done, firm well the soil as the new hole is filled. Be careful to put fine mold about the roots, but above all be sure it is in close contact. Broken and mutilated roots should be cut off smooth, that they may callus quickly, and from them new roots will issue.

Wet the roots before putting earth on them, that it may adhere closely. Plant in well-drained soil and at about the same depth as the tree or plant stood in the nursery.

We do not approve of indiscriminate and extensive pruning at any period of the tree's life, but if the roots are much shortened some pruning of the top is necessary to maintain a balance. Beech, Oak, Sweet Gum, Mulberry and Tulip trees ought to be shortened in very severely.

Cut to the trunk or a bud always, that you may not later have unsightly and dead spurs on the tree that delay the process of healing.

Mulch the surface after planting with anything that will conserve moisture, and for this purpose leave the surface of the soil loose and porous, applying in addition brush, straw or coarse manure. The latter is best, since by leaching it adds the element of fertility.

Planting Evergreens is more difficult than planting deciduous trees, particularly if large, and extra care must be taken to keep the roots from becoming dry. Chances of success are much greater with small and medium sized trees, and choice and rare sorts should be moved with a ball of earth attached when possible. The safety of this practice very greatly counterbalances increased cost, and we strongly urge patrons to adopt it.

ORNAMENTAL DEPARTMENT

DECIDUOUS TREES

DECIDUOUS SHRUBS

The shrubs we offer are of standard commercial grade, young and thrifty. They are not crowded in rows to make them grow tall, but are given space enough for proper development. This insures a bushy and full plant, which far more than height ought to be, and indeed is, the standard of excellence. Nearly all our shrubs are dug with a tree digger, thus insuring good roots, and are exactly what we represent them to be in all particulars.

CONIFERS AND EVERGREENS

These have all been transplanted, most of them several times, giving ample room for full development and frequently sheared to produce compact, symmetrical specimens. Those marked with a ** will not be balled and burlapped at the prices named.
